CONGRESOS Y JORNADAS

Las fechas límite han sido revisadas en las correspondientes webs de cada uno de los congresos atendiendo a la situación actual de pandemia mundial. Cualquier cambio que tengamos constancia se os hará llegar.

XIII CONGRESO IBERO-LATINOAMERICANO DE ESTUDIOS RURALES
Organizador: Instituto de Historia y Ciencias Sociales Universidad Austral de Chile
Lugar: Valdivia, Chile
Fecha: 26-28 enero, 2022
Fechas clave: 10 de enero de 2022 Publicación del programa XIII CIER 2022. 20 de enero de 2022 Publicación de libro digital con ponencias en web del congreso. 26 al 28 de enero de 2022 Realización XIII CIER 2022
Enlace/más información: https://www.cier2020.cl/announcement/schedule/ Email: contacto@cier2020.cl

29th Colloquium of the IGU Commission on the Sustainability of Rural Systems
Organizador: Unión Geográfica Internacional
Lugar: El Cairo, & Shebeen-Elkom, Menoufia University Egypt
Fecha: February 28- March 4, 2022
Enlace/más información: https://mu.menofia.edu.eg/art/igucrs2022/ConHome/en Email: igucrs2022@art.menofia.edu.eg

SETTLE International Congress: "Population imbalances in Europe"
Organizador: ERASMUS+ project entitled: "Population imbalances in Europe: challenges of urban concentration versus rural depopulation" (SETTLE)
Lugar: University of Alcalá
Fecha: 27th, 28th and 29th April 2022
Fechas clave: A summary of around 100 words must be submitted before 28th January, 2022
Enlace/más información: http://www.iaes.es/settle-2020.html Email: settle@uah.es

Itineraries for territorial regeneration. Promotion and enhancement of territories: reticular and sustainable developments
Organizador: Institute of History of Mediterranean Europe (Isem) - National Research Council (CNR), the "Centro Italiano per gli Studi Storico-Geografici (CISGE)", the "Gruppo di Ricerca Interuniversitario GECOAGRI-LANDITALY" and the "Società Geografica Italiana". There is no registration fee.
Lugar: The event will take place in Rome, at the headquarters of the CNR and the Italian Geographic Society.
Fecha: 22-24 June 2022.
Fechas clave: Colleagues interested in discussing the proposed topics are invited to fill out the registration form on the webpage of the Conference (https://www.cisge.it/rigenerazione-territoriale/), no later than January 12, 2022, by indicating title, abstract (maximum 2500 characters), authors' names, affiliations. The abstracts received will be evaluated by the Scientific Committee and the authors will receive the approval of their proposal by January 30, 2022. The contributions submitted (full texts must be sent no later than April 29, 2022) will be collected, after review process, in an Open Access volume published by FrancoAngeli at the end of the Conference. Forms and modalities for the presentation of papers will be indicated later.
Enlace/más información: https://www.cisge.it/rigenerazione-territoriale/ Email: paesaggi ferroviari lucani@gmail.com

XVII Coloquio Ibérico de Geografía
Organizador: Departamento de Geografía de la Universidad de Salamanca
Lugar: Facultad de Geografía e Historia de la Universidad de Salamanca, Salamanca
Fecha: 4 A 6 DE JULIO DE 2022.
Fechas clave: Respuesta de aceptación: 14 de enero de 2022 Envío de textos (entre 2.000 y 3.500 palabras): 1 de abril de 2022 Respuesta a textos: 13 de mayo de 2022 Envío textos revisados/definitivos: 31 de mayo de 2022

Colorural 2022 Santiago de Compostela. ¿Renacimiento rural? Los espacios rurales en época de post-pandemia

Organizador: AGE, Grupo Geografía Rural, Universidad de Santiago de Compostela.

Lugar: Universidad de Santiago de Compostela, Santiago de Compostela

Fecha: 5 al 8 de octubre 2022

Rural Geographies in Transition

Organizador: Faculty of Spatial Sciences of the University of Groningen (<http://www.rug.nl/frw/>).

Lugar: Groningen, The Netherlands

Fecha: June 23-26, 2023

Now that COVID-19 holds us in its grip a bit longer than we expected, the Local Organising Committee of the 3rd European Rural Geographies Conference has decided to cancel the 2021 Conference as well. It is too uncertain if we will be able soon.

We have discussed alternative dates with the organisers of other rural conferences in Europe. Given that the Nordic Conference for Rural Research is scheduled for May 23rd – 25th 2022 in Finland, and the European Society for Rural Sociology (ESRS) conference is scheduled for June 21-24 2022 in Aveiro-Portugal, we decided to set the new date for the Rural Geographies Conference to 2023 and chose 26-30 June.

You will receive more information and a new calls for papers mid-2022.

Fechas clave: June 23-26, 2023

Diciembre 2021

Guest Editor

Department of Environmental Science and Policy, University of Milan, Milano, Italy

Interests: environmental economics; rural development; sustainable agriculture; agricultural economics; agricultural policies

Prof. Dr. Raffaele Cortignani

Guest Editor

Department of Agricultural and Forest Sciences, Tuscia University, Viterbo, Italy

Interests: economic modeling; sustainable agriculture; forecasts; environmental analysis; mathematical programming; farm management; climate change; agricultural policies

Special Issue Information

Dear Colleagues,

The COVID-19 pandemic is emphasizing the importance of a resilient food system that ensures affordable food for consumers and helps to uncover the existing critical interrelations between ecosystem preservation, food system characteristics, and health. The need for a transition toward a more sustainable food system maximizing environmental, health, and social benefits while supporting economic growth is therefore particularly needed.

To foster this transition, countries are asked to orient their policy interventions in agriculture to improve their response to societal demands on food and health, including safe, nutritious, and sustainable food. Agricultural policies need to adapt to the current challenges, which leads to two relevant and related research gaps. Empirical evidence on the fitness and suitability of traditional measures and interventions in agriculture in achieving the expected outcomes and impact is particularly limited with regard to novel expectations and requests. The latter requires a better understanding of farm responses, of farmers' willingness and capacity to adhere to the policy measures, and how these might impact the environmental and economic farming dimensions. Secondly, the need for the development of new methodologies and tools to analyze and deeply understand the impact of policy decisions on the novel spheres has been accelerated.

The Special Issue aims to include both empirical research articles and conceptual pieces covering (but not limited to) all stages of the agri-food system, from production to distribution, marketing, and consumption, which may contribute to develop an evidence base for rural development policies and interventions to address novel, emerging societal problems in both developed and developing countries.

Interests: human geography; rural development; agrarian landscapes; rural tourism

Special Issue Information

Dear Colleagues,

The European Rural Development Policy and, specifically, the LEADER Approach, are key tools in the endogenous, local, participatory and sustainable development of the rural environment and in its planning as an inhabited territory with needs. Throughout its 30-year history, they have been rethought several times, with 2021–2027, according to the usual community operation, being the sixth programming period. During all these stages, the importance and repercussions of the method for the European rural environment and for those territories that have taken it as an example, are unquestionable, and perhaps even more so today due to the demographic and socioeconomic reality faced by the different entities and public administrations that manage the funds.

We are interested in papers that study and investigate, both from theoretical and normative points of view as well as quantitative and statistical, the history of the Rural Development Policy and LEADER from its character of "community initiative" with specific funds assigned by the European Commission for each State Member until its consolidation, in 2007, as an axis of action of the EAFRD (European Agricultural and Rural Development Fund). In addition, it is necessary to investigate the new approaches for the future period 2021–2027 and the implementation of similar models in other regions of the world, that is, the future of public action policies designed to achieve greater and better rural development and not only at the European level, but also in other rural territories with the same needs, even more so in the current context of clear political and economic uncertainty.

We consider this an important multidisciplinary problem in which numerous researchers are involved. We encourage authors to submit contributions in the following priority areas to this Special Issue of Sustainability:

Strategies with which to alleviate the demographic and socioeconomic problems of the rural environment and to contribute to sustainable land use planning.

New models of sustainable rural development for land use planning.

Approaches of rural development and their evolution in the world, e.g., European policies and rural development programs and

Diciembre 2021

strategies to diversify the rural economies.
Rural partnerships and their roles in the development and stability of the rural economy and population.
The past, present, and future of rural development policy in Europe and its influence on other rural areas in the world.
Transnational cooperation for rural development.
Gender perspective in rural development policies.

Interests: Mediterranean mountain areas; local development; regional policies impact on territories

Special Issue Information

Dear Colleagues,

This Special Issue focuses on how recent urbanization processes modifies the organization and management of the land uses at integrated rural areas in peri-urban and intra-metropolitan areas at local, national, and global levels.

Recent rural dynamics are primarily characterized by three interrelated trends: economic diversification, deagrarianization, and depopulation; the first two of which common to all rural areas.

It is true that deagrarianization and the simultaneous shift towards a service economy in present-day rural economies and societies have not led to the disappearance of rural space but instead some rural areas are presenting extraordinary territorial and economic transformation. These comprise zones that fall between the countryside and the city where intensive rural urbanization or peri-urbanization processes are taking place.

In the past, primary sector activities were very important, but their importance has steadily declined in both absolute and relative. Agricultural activity has become relatively unimportant as urban activities and functions acquire greater prominence.

This has substantially weakened and modified agricultural activities and transformed land use patterns in rural regions.

Nevertheless, in recent decades, agricultural activities had received new functions in peri-urban areas. As a common factor of all them, the acknowledgment of biodiversity and heritage values in the agricultural uses and the compatibility of both with quality food production. These concepts include eco-system services, peri-urban agricultural parks or home market agriculture, and urban productive landscapes.

Land use policy, especially legal regulations relating to construction land supply, are critical tools to harness territorial development. The policy trajectory of construction land supply entails a complicated reconfiguration of public functions, which is driven by rural–urban relations. The integrated urban-rural development should be raised through the experimentation of a new use policy and land management.

Many unanswered questions remain regarding the impacts of urbanization on rural areas. Contributions to this Special Issue could serve to provide some answers.

We invite papers that link countryside urbanization, deagrarianization, land management, land use planning, urban sprawl into rural areas, and integrated rural-urban development.

Manuscript Submission Information

Manuscripts should be submitted online at www.mdpi.com by registering and logging in to this website. Once you are registered, click here to go to the submission form. Manuscripts can be submitted until the deadline. All papers will be peer-reviewed. Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the special issue website. Research articles, review articles as well as short communications are invited. For planned papers, a title and short abstract (about 100 words) can be sent to the Editorial Office for announcement on this website.

Submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere (except conference proceedings papers). All manuscripts are thoroughly refereed through a single-blind peer-review process.

A guide for authors and other relevant information for submission of manuscripts is available on the Instructions for Authors page. Land is an international peer-reviewed open access monthly journal published by MDPI.

Please visit the Instructions for Authors page before submitting a manuscript. The Article Processing Charge (APC) for publication in this open access journal is 1800 CHF (Swiss Francs). Submitted papers should be well formatted and use good English. Authors may use MDPI's English editing service prior to publication or during author revisions.

NOTICIAS GRUPO RURAL/AGE

Felices Fiestas y Entrada de Año Nuevo

El Grupo de Geografía Rural se despidió de este año 2021, esperando nuestro reencuentro en el próximo año 2022 en el Colorural a celebrar en Galicia durante el mes de Octubre.

EXPERIENCIAS Y BUENAS PRÁCTICAS

El Hueco Oxma – Rural Innovation

Fuente: https://enrd.ec.europa.eu/projects-practice/el-hueco-oxma-rural-innovation_en

El Hueco Oxma is a Social Enterprise (SE) established in a small village in Soria, Spain, which is one of the most depopulated regions in Europe. Its goal is to foster social innovation and entrepreneurship in rural areas and act as an innovative enterprise incubator.

El Hueco Oxma focuses on creating an environment where rural entrepreneurial and innovative initiatives can flourish. It offers numerous services, such as a coworking area (working area and furniture), a meeting room, consulting (entrepreneurial, legal, financial and technological) and on-demand services (marketing, on-demand software, event planning etc.). Support from the Rural Development Programme of Castilla y León, helped the SE to organise a wide range of activities to stimulate interactions among co-workers and external guests, as well as thematic workshops on rural development.
